海大資工Java程式設計課程
Exercise 0

SOSEL
Service-Oriented Software Engineering Lab

Spring 2026

Step 0

- Please complete the pre-course survey (Google form). (請填寫課前問卷(Google表單))
  - https://tiny.cc/2026-ntou-java-survey

Step 1

- Please copy the following code to VS Code or another editor. (請先將底下程式碼複製到VS Code或其他編輯器中)

```
// 這是你這堂課的第一支Java程式
public class FirstClass {
    // main method begins execution of Java application
    public static void main(String[] args) {
        String output = "";
        System.out.println("這是我的第一支Java程式!");
        System.out.println(output);
    } // end method main
}
```

Step 2

- Please modify the code to enable it to output your student number and name. The possible output results are as follows. (請修改程式內容，使其可輸出你的學號和姓名，可能輸出結果如下)

```
這是我的第一支Java程式!
學號："11111111"
姓名："山本由伸"
```

  - Please note that you cannot add lines to the code on the previous page, and the output should contain double quotes. (請注意，不能幫前頁的程式碼增加行數，而輸出的結果應包含雙引號符號)

Step 3

- Please name your Java file correctly first and save it. (請先正確命名你的Java程式檔名並存檔)
  - 提示：檔名必須跟類別名稱一樣
- Compile it (using the command “javac”)
- Execute it (using the command “java”)

Step 4

- Please upload your code and the screenshot of the execution result, including the issued commands and parameters, to TronClass.
  (請上傳你的**程式碼**和**執行結果截圖**(包含下的指令和參數)至TronClass)
